

**NZ TELEHEALTH**  
FORUM & RESOURCE CENTRE

YOU'RE INVITED TO A TELEHEALTH WEBINAR:

# AI and Telehealth

**WEDNESDAY 5 JUNE,**  
**7PM - 8PM**

**MODERATOR:**  
**Scott Arrol**

*Programme Manager,  
NZ Telehealth  
Leadership Group*

There was a huge leap to telehealth during the pandemic, and now we are seeing another leap when it comes to AI-powered tools providing significant opportunities to increase access to healthcare. From virtual health assistants to predictive analytics, AI in telehealth offers a promising future for more effective, equitable and efficient healthcare delivery. But how will AI bridge or widen gaps in healthcare access?

This webinar aims to discuss opportunities, gaps, risks and the future of healthcare when telehealth and AI come together.

Key themes:

- Human factors of AI for telehealth – the “Human-AI Team”
- Opportunities for AI enabled telehealth to make a positive difference for healthcare delivery
- Accessing health and disability services made easier for some and possibly harder for others – equity, legal, ethical, other considerations
- Community of Practice launched

Register today and contribute to the discussion through the Q&A. We welcome anyone interested in access to health care, telehealth and virtual healthcare to join and be part of the conversation.

**PANELLISTS**

**Chris Paton** *Director, Postgraduate Digital Health Programme,  
University of Otago*

**Mike Mulvaney** *Chief Information Officer, Whakarongorau Aotearoa*  
**Sally Britnell** *Senior Lecturer in nursing at AUT University  
& Senior Research Fellow for the School of  
Clinical Sciences*
